EVOLUTION

INTERNATIONAL JOURNAL OF ORGANIC EVOLUTION

PUBLISHED BY

THE SOCIETY FOR THE STUDY OF EVOLUTION

Vol. 52 **Subject Index** **1998**

Evolution, 52(6), 1998, pp. 1881–1890

ALGAE

Alexandrium minutum, competition, spontaneous mutation, 610

AMPHIBIANS

Allozyme electrophoresis, barriers to dispersal, frog, genetic divergence, population genetic structure, range change, southwestern Australia, speciation, 1147

Ambystoma barbouri, gene flow, ineffective antipredator behavior, local adaptation, 558

Anura, comparative method, frogs, reproductive isolation, speciation, 1811

Bombina, cline, habitat preference, hybrid zone, linkage disequilibrium, 227

ARACHNIDS

Adaptive radiation, Araneae, key innovation, null Markovian model, orb web evolution, 403

Allometry, genitalia, sexual selection, 415

Frequency-dependent selection, happy-face spider, population structure, 775

BACTERIA

Allelopathy, colicin resistance, colicins, *Escherichia coli*, pleiotropy, 1270

Antibiotic resistance, conjugation, *Escherichia coli*, experimental evolution, host density, parasite, plasmid, tradeoff, transmission mode, virulence, 315

Bacterial evolution, group selection, homoserine lactones, quorum sensing, signaling, 1263

Malaria, mixed infection, parasite, *Plasmodium chabaudi*, virulence, 583

BEHAVIOR

Aggression, courtship, *Drosophila silvestris*, heritability, sexual selection, 1487

Allorecognition, ascidian, behavioral evolution, histocompatibility, space competition, 746

Anarchy, *Apis mellifera*, kin selection, laying workers, social insects, worker policing, 1408

Avian behavior, behavioral evolution, congruence, DNA-DNA hybridization, phylogeny, 884

Cooperative communication, game theory, handicap principle, honest signaling, signal detection theory, 1554

Dimorphism, genetic correlation, heritability, trade-offs, 1111

Microsatellites, *Polistes*, relatedness, social control, worker policing, 797

BIOGEOGRAPHY

Aesculus, biogeography, Hippocastanaceae, internal transcribed spacers, *matK*, origin, phylogeny, 988

Albinaria, Crete, land snails, mitochondrial ribosomal RNA, molecular systematics, paleogeography, phylogeography, 116

Allozyme, *Avicennia*, biogeography, diversity, genetics, mangrove, phylogeny, 1612

Allozymes, Asteroidea, Indo-West Pacific biogeography, larval dispersal, *Linckia laevigata*, PCR-RFLP, population genetics, 87

Allozymes, biogeography, Crustacea, *Daphnia*, dispersal, mtDNA, 1648

Allozymes, biogeography, fish, gene flow, *Heterandria formosa*, isolation by distance, migration, nonequilibrium, stepping-stone model, 183

Allozymes, biogeography, mtDNA, phylogeography, Point Conception, *Tigriopus*, 734

Allozymes, COI, dispersal, geographic isolation, phylogeography, Pleistocene, Point Conception, range expansion, 12S, vicariance, zoogeographic boundary, 757

Apis mellifera, intergradation, microsatellite, mtDNA, population genetics, SSR, 1119

Biogeography, Cerataphidini, eusociality, mitochondrial DNA, molecular phylogenetics, social behavior, soldier aphids, 155

Biogeography, evolution, genetics, parasite, pathogen, trade-off, virulence, 1865

Clinal variation, hybrid zone, introgression, katydid, *Orchelimum*, Potomac, southeastern United States, species replacement, Tettigoniidae, 784

Cytochrome oxidase I, marine biogeography, *Tegula*, 12S rRNA, 1311

Daphnia magna, dose effects, genetic correlation, *Glugoides intestinalis*, parasite, trade-off, within-host growth, 1869

Hybrid zone, marine biogeography, *Menippe*, mitochondrial DNA, phylogeography, Suwanee Straits, 1671

BIRDS

Acrocephalus arundinaceus, lifetime reproductive success, natal dispersal, site fidelity, 877

Avian behavior, behavioral evolution, congruence, DNA-DNA hybridization, phylogeny, 884

Barnacle goose, body size, *Branta leucopsis*, food quality, reproductive success, selection, survival, 1169

Body size, CHD gene, extrapair paternity, *Ficedula albicollis*, genetic correlation, heritability, microsatellites, natural selection, sexual dimorphism, 870

Brood parasitism, coevolution, cospeciation, mitochondrial DNA restriction sites, phylogeny, *Vidua*, 566

Cepphus, glacial refugia, mitochondrial control region, phylogeography, Pleistocene, population genetics, speciation, 1158

Climate, life history, morphology, mortality, Nebraska, Petrochelidon, pyrrhonota, survival, 1461

Condition-dependent plumage traits, environmental effects, genetic plumage polymorphisms, secondary sexual characters, *Tyto alba*, 1451

Feather ornaments, Fisherian mechanism, indicator models, runaway process, sexual selection, viability models, 859

Hummingbird, hybrid fitness, hybrid zone, interspecific gene flow, *Ipomopsis*, pollen export, pollen receipt, pollinator effectiveness, 1602

Inbreeding, inbreeding depression, lethal equivalents, lifetime reproductive success, pedigree, song sparrow, survival, 240

Plumage color, sexual dichromatism, sexual dimorphism, sexual selection, tanager, Thraupidae, 1219

BOOK REVIEWS

All my love is towards individuals, a review of *Metaphysics and the Origin of Species*, by Michael Ruse, 283

Are evolutionists still hooked on progress? a review of *Monad*

© 1998 The Society for the Study of Evolution. All rights reserved.

to Man: The Concept of Progress in Evolutionary Biology, by David Depew, 921
Darwin on disk, a review of The Darwin Multimedia CD-ROM, 2d ed., by Kelly Dyer, 295
Evolutionary genetics on the fly, a review of *Progress and Prospects in Evolutionary Biology: The Drosophila Model*, by Daniel L. Hartl, 631
Finding ways to live together, a review of *Cooperation among Animals: An Evolutionary Perspective*, by Anne E. Magurran, 925
Handicap signaling: loud and true? a review of *The Handicap Principle: A Missing Piece of Darwin's Puzzle*, by Andrew Pomiankowski and Yoh Iwasa, 928
High enthusiasm and low *R*-squared, a review of *Asymmetry, Developmental Stability, and Evolution*, by David Houle, 1872
The place of hybridization in evolution, a review of *Natural Hybridization and Evolution*, by John A. Endler, 640
Quantitative genetics and phenotypic evolution, a review of *Evolutionary Quantitative Genetics*, by Trudy F. C. Mackay, 635
A tough cell, a review of *Cells, Embryos, and Evolution*, by Gregory A. Wray, 291
Vertebrates and evolution, a review of *Patterns and Processes of Vertebrate Evolution*, by Philip D. Gingerich, 289
Wonderful crucible, a review of *The Crucible of Creation: The Burgess Shale and the Rise of Animals*, by Andrew Berry, 1528

Bryozoans
Bryozoan, inducible defense, *Membranipora*, norm of reaction, phenotypic plasticity, 80

Cnidaria
Clonal structure, coral reef, disturbance, DNA fingerprinting, genotypic diversity, octocoral, vegetative propagation, 379

Coalescence
Coalescent, gene flow, gene genealogy, neutrality, polymorphism, population structure, straying, 539

Coevolution
Biomphalaria glabrata, heritability, host-parasite coevolution, resistance, *Schistosoma mansoni*, strain specificity, susceptibility, 1627
Brood parasitism, coevolution, cospeciation, mitochondrial DNA restriction sites, phylogeny, *Vidua*, 566
Clonal diversity, frequency-dependent selection, parasitism, Red Queen hypothesis, 1057
Coevolution, Coleoptera, cytochrome oxidase I, *Dendroctonus*, insect-plant interactions, mitochondrial DNA, molecular systematics, phylogeny, phytophagous insects, 1731
Coevolution, host shifts, insect-host plant interactions, Lepidoptera, Papilionoidea, specialization, 486
Coevolution, mtDNA, nuclear intron, phylogeography, Prodoxidae, 1376
Diffuse coevolution, *Heliothis phloxiphagus, Hylemya, Ipomopsis aggregata*, multispecies coevolution, pairwise coevolution, plant-herbivore interaction, scarlet gilia, 1583
Host-parasite coevolution, Muller's ratchet, mutational deterministic hypothesis, Red Queen hypothesis, sexual reproduction, synergistic epistasis, 604

Competition
Alexandrium minutum, competition, spontaneous mutation, 610
Allorecognition, ascidian, behavioral evolution, histocompatibility, space competition, 746
Colonizing species, competition between species, *Drosophila pseudoobscura, Drosophila subobscura*, relative fitness, 269
Compatibility, cryptic female choice, sexual selection, sperm choice, sperm competition, 1212
Competition, environmental stress, geographic parthenogenesis, mutational deterministic hypothesis, *Potamopyrgus antipodarum*, sexual reproduction, 1482
Drosophila, microsatellites, multiple mating, sperm competition, 1334
Female choice, genetic incompatibility, good genes, *Gryllus bimaculatus*, inbreeding, polyandry, sperm competition, 1726
Interaction-dependent sexual selection, interaction-independent sexual selection, intersexual competition, mate choice, sexual selection, 8

Crustaceans
Allozymes, biogeography, Crustacea, *Daphnia*, dispersal, mtDNA, 1648
Biogeography, evolution, genetics, parasite, pathogen, trade-off, virulence, 1865
Daphnia magna, dose effects, genetic correlation, *Glugoides intestinalis*, parasite, trade-off, within-host growth, 1869
Hybrid zone, marine biogeography, *Menippe*, mitochondrial DNA, phylogeography, Suwanee Straits, 1671

Development
Aging, developmental time, laboratory evolution, life history, selection, 1713
Antagonistic pleiotropy, body size, developmental time, *Drosophila*, genetic correlation, polymorphic inversions, trade-offs, viability, 144
Body size, development, diapause, genetic variation, growth rate, life history, phenotypic plasticity, *Scathophaga stercoraria*, 1394
Canalization, epistasis, evolution of development, phenotype landscape, quantitative genetics, 647
Desiccation, developmental time, *Drosophila melanogaster*, growth rate, life-history evolution, physiology, starvation, stress resistance, trade-offs, 1342
Developmental time, genetics, high temperature, stress, trade-offs, 841

Developmental Stability
Developmental innovation, female gametophyte, fertilization, *Gnetum*, heterochrony, seed plants, 1016
Developmental instability, environmental stress, fluctuating asymmetry, genetic stress, *Lychnis viscaria*, marginal populations, population size, 1285
Developmental stability, fluctuating asymmetry, geometric morphometrics, *Glossina palpalis*, Procrustes analysis, shape, tsetse flies, wing veins, 1363
Developmental time, genetics, high temperature, stress, trade-offs, 841
Drosophila, evolvability, field, fluctuating asymmetry, heritability, 816

Drosophila
Adh, COI, *Drosophila willistoni, period*, phylogenetics, species concepts, 1093
Age-specific mutations, antagonistic pleiotropy, demography, mortality plateau, mutation accumulation, senescence, 454
Aggression, courtship, *Drosophila silvestris*, heritability, sexual selection, 1487
Antagonistic pleiotropy, body size, developmental time, *Drosophila*, genetic correlation, polymorphic inversions, trade-offs, viability, 144
Artificial selection, *Drosophila melanogaster*, intermediary metabolism enzymes, metabolic rate, starvation, starvation resistance, stress resistance, 1679
Body size, *Drosophila melanogaster*, environmental stress, heat resistance, larval density, selection, 619
Bottleneck, *Drosophila*, founder-flush, premating isolation, speciation, 1850
Characteristic value, *Drosophila simulans*, genetic variation, phenotypic plasticity, reaction norm, 1501
Climatic adaptation, *Drosophila ananassae, D. melanogaster*, India, *Zaprionus indianus*, 825
Colonizing species, competition between species, *Drosophila pseudoobscura, Drosophila subobscura*, relative fitness, 269
Courtship song, *Drosophila*, genetic distance, postmating isolation, sexual isolation, speciation, 1493
Desiccation, developmental time, *Drosophila melanogaster*, growth rate, life-history evolution, physiology, starvation, stress resistance, trade-offs, 1342
Developmental time, genetics, high temperature, stress, trade-offs, 841

Dominance, *Drosophila*, homeostasis, sex, sexual selection, speciation, 1080
Drosophila, environmental stress, evolvability, heritability, variation, 1207
Drosophila, evolvability, fecundity, heritability, nature, temperature, 134
Drosophila, evolvability, field, fluctuating asymmetry, heritability, 816
Drosophila, general-purpose genotypes, genetic variation, host races, host specificity, *Howardula*, parasites, 832
Drosophila, Haldane's rule, hybrid sterility, reproductive isolation, speciation, spermatogenesis, 1067
Drosophila, mating choice tests, mating propensity, sexual isolation, 126
Drosophila, microsatellites, multiple mating, sperm competition, 1334
Drosophila hibisci, ecological genetics, epistasis, genotype-by-environment interactions, *Hibiscus*, latitudinal cline, line-cross analysis, maternal effects, ovariole number, 806
Drosophila melanogaster, gamma-Gompertz model, life span, mortality parameters, senescence, 1844
Drosophila pseudoobscura, hybrid sterility, sperm heteromorphism, sperm motility, 266

ECHINODERMS
Allozymes, Asteroidea, Indo-West Pacific biogeography, larval dispersal, *Linckia laevigata*, PCR-RFLP, population genetics, 87
Bateman's principle, echinoid, egg size, fertilization success, sexual selection, sperm limitation, 1043

ECOLOGY
Allozymes, comparative approach, *Etheostoma*, life history, mitochondrial DNA, *Percina*, population history, 1781
Aposematism, benzaldehyde, chemical defense, *Cicindela*, cryptic coloration, habitat association, predator, 529
Chemical defense, Chrysomelidae, host plants, larval defensive secretion, *Phratora vitellinae*, plant-herbivore interactions, Salicaceae, 517
Chrysomelidae, host fidelity, host preference, insect-plant interactions, *Neochlamisus bebbianae*, pleiotropy, reproductive isolation, sibling species, 1744
Climate, life history, morphology, mortality, Nebraska, Petrochelidon, pyrrhonota, survival, 1461

ELECTROPHORESIS
Allozyme, *Avicennia*, biogeography, diversity, genetics, mangrove, phylogeny, 1612
Allozyme electrophoresis, barriers to dispersal, frog, genetic divergence, population genetic structure, range change, southwestern Australia, speciation, 1147
Allozymes, Asteroidea, Indo-West Pacific biogeography, larval dispersal, *Linckia laevigata*, PCR-RFLP, population genetics, 87
Allozymes, biogeography, Crustacea, *Daphnia*, dispersal, mtDNA, 1648
Allozymes, biogeography, fish, gene flow, *Heterandria formosa*, isolation by distance, migration, nonequilibrium, stepping-stone model, 183
Allozymes, biogeography, mtDNA, phylogeography, Point Conception, *Tigriopus*, 734
Allozymes, chloroplast DNA, gene flow, isolation by distance, phylogeography, population structure, refugia, *Senecio*, 355
Allozymes, COI, dispersal, geographic isolation, phylogeography, Pleistocene, Point Conception, range expansion, 12S, vicariance, zoogeographic boundary, 757
Allozymes, comparative approach, *Etheostoma*, life history, mitochondrial DNA, *Percina*, population history, 1781
Cave Isopoda, F_{ST}, gene flow, private alleles, 432
Clone, environmental heterogeneity, genetic variation, intense selection, obligate parthenogen, *Penthaleus major*, 1325
Drosophila, microsatellites, multiple mating, sperm competition, 1334
Frequency cline, genetic succession, microevolution, natural populations, overproduced esterase, pleiotropy, 443

EPISTASIS
Average effect, conversion, epistasis, Fisher, interdemic selection, metapopulation, shifting balance, variance components, Wright, 1537
Canalization, epistasis, evolution of development, phenotype landscape, quantitative genetics, 647
Correlational selection, epistasis, genetic correlation, genetic integration, indirect genetic effects, kin effects, maternal effects, 299
Cytonuclear interactions, epistasis, Louisiana irises, natural hybridization, natural selection, RAPDs, reproductive isolation, 1304
Deleterious mutations, inbreeding depression, *Plantago coronopus*, self-fertilization, serial inbreeding, synergistic epistasis, 692
Drosophila hibisci, ecological genetics, epistasis, genotype-by-environment interactions, *Hibiscus*, latitudinal cline, line-cross analysis, maternal effects, ovariole number, 806
Epistasis, freshwater snail, genetic load, inbreeding depression, *Lymnaea peregra*, mating system, self-fertilization, 1635
Host-parasite coevolution, Muller's ratchet, mutational deterministic hypothesis, Red Queen hypothesis, sexual reproduction, synergistic epistasis, 604

EVOLUTION
Acetylcholinesterase, clines, *Culex pipiens*, fitness cost, gene duplication, insecticide resistance, resistance gene, 1705
Adaptation, Fisher's model, natural selection, phenotypic evolution, quantitative trait locus, 935
Adaptive radiation, Araneae, key innovation, null Markovian model, orb web evolution, 403
Allometry, comparative method, independent contrasts, phylogeny, random trees, Rensch's rule, sexual size dimorphism, 1197
Allorecognition, ascidian, behavioral evolution, histocompatibility, space competition, 746
Antibiotic resistance, conjugation, *Escherichia coli*, experimental evolution, host density, parasite, plasmid, tradeoff, transmission mode, virulence, 315
Bacterial evolution, group selection, homoserine lactones, quorum sensing, signaling, 1263
Best-fit models, long-branch attraction, maximum likelihood, minimum evolution, phylogeny reconstruction, 978
Biogeography, evolution, genetics, parasite, pathogen, trade-off, virulence, 1865
Body size, comparative methods, multiple regression, phylogenetic autocorrelation, phylogenetic inertia, principal coordinate analysis, 1247
Bryozoan, inducible defense, *Membranipora*, norm of reaction, phenotypic plasticity, 80
Canalization, epistasis, evolution of development, phenotype landscape, quantitative genetics, 647
Character evolution, oviparity, phylogeny, reproductive mode, reptiles, squamates, viviparity, 1441
Characteristic value, *Drosophila simulans*, genetic variation, phenotypic plasticity, reaction norm, 1501
Coancestry coefficient, evolution, genealogy, molecular phylogeny, pedigree, 957
Correlation analysis, experimental design, multiple comparisons, power of test, 251
Correlational selection, epistasis, genetic correlation, genetic integration, indirect genetic effects, kin effects, maternal effects, 299
Crassostrea, dioecy, evolution, hermaphroditism, mollusk, oyster, protandry, sex, sex change, sex determination, sexual maturation, 394
Daphnia magna, dose effects, genetic correlation, *Glugoides intestinalis*, parasite, trade-off, within-host growth, 1869
Developmental innovation, female gametophyte, fertilization, *Gnetum*, heterochrony, seed plants, 1016
Diffusion approximation, Sewall Wright, shifting-balance theory, stochastic simulation models, substructured populations, 1834
Evolution, fire ants, introduced species, monogyny, mtDNA, polygyny, relatedness, social insects, *Solenopsis invicta*, 1416

Evolution of fitness, experimental evolution, Muller's ratchet, RNA viruses, VSV, 309
Female preference, interlocus contest evolution (ICE), intersexual conflict, mate choice, sensory exploitation, sexual selection, 1
Frequency cline, genetic succession, microevolution, natural populations, overproduced esterase, pleiotropy, 443
Limb evolution, parsimony, polydactyly, tetrapods, 1476

EXTINCTION
Colonization, extinction, life history, outcrossing, perenniality, seed bank, self-fertilization, 657
Extinction, gene flow, genetic differentiation, isolation by distance, marine angiosperm, recolonization, theta, *Zostera marina*, 330

FISHES
Adaptive radiation, body size, natural selection, reproductive isolation, speciation, stickleback, 209
Allozymes, biogeography, fish, gene flow, *Heterandria formosa*, isolation by distance, migration, nonequilibrium, stepping-stone model, 183
Allozymes, comparative approach, *Etheostoma*, life history, mitochondrial DNA, *Percina*, population history, 1781
Anatomy, brain, developmental constraints, electric organs, histology, morphology, phylogenetic analysis, sensory receptors, specialization, vertebrate, 1760
Associative overdominance, *Gadus morhua*, growth rate, heterozygosity, nuclear RFLP loci, 915
Bottleneck, conservation, evolutionarily significant unit, parasite resistance, polymorphism, 194
Coalescent, gene flow, gene genealogy, neutrality, polymorphism, population structure, straying, 539
Cuckoldry, kleptogamy, mating system, polygamy, 848
Cuckoldry, maternity, mating system, microsatellites, paternity, polygyny, sexual selection, 1802
Cyprinodon tularosa, *Pgdh*, phosphogluconate dehydrogenase, salinity, selection, translocation, White Sands pupfish, 1856
Cytochrome *b*, mitochondrial DNA, phylogeny, speciation, species flock, 1135
Effective population size, genetic drift, mtDNA, temporal variation, 910
Prezygotic isolation, reinforcement, reproductive character displacement, speciation, sticklebacks, 200

FITNESS
Acrocephalus arundinaceus, lifetime reproductive success, natal dispersal, site fidelity, 877
Associative overdominance, *Gadus morhua*, growth rate, heterozygosity, nuclear RFLP loci, 915
Bombina, cline, habitat preference, hybrid zone, linkage disequilibrium, 227
Colonizing species, competition between species, *Drosophila pseudoobscura*, *Drosophila subobscura*, relative fitness, 269
Decision rule, directional selection, mate choice, multivariate analysis, nonlinear selection, selection gradient, 1383
Developmental time, genetics, high temperature, stress, tradeoffs, 841
Evolution of fitness, experimental evolution, Muller's ratchet, RNA viruses, VSV, 309
Fitness, genotype-environment interaction, natural selection, spatial variation, temporal variation, 678
Fitness, gynodioecy, inbreeding depression, male fitness components, maternal effects of inbreeding, outbreeding depression, 44

GASTROPODS
Albinaria, Crete, land snails, mitochondrial ribosomal RNA, molecular systematics, paleogeography, phylogeography, 116
Allozymes, COI, dispersal, geographic isolation, phylogeography, Pleistocene, Point Conception, range expansion, 12S, vicariance, zoogeographic boundary, 757
Biomphalaria glabrata, heritability, host-parasite coevolution, resistance, *Schistosoma mansoni*, strain specificity, susceptibility, 1627
Clonal diversity, frequency-dependent selection, parasitism, Red Queen hypothesis, 1057
Competition, environmental stress, geographic parthenogenesis, mutational deterministic hypothesis, *Potamopyrgus antipodarum*, sexual reproduction, 1482
Cytochrome oxidase I, marine biogeography, *Tegula*, 12S rRNA, 1311
Epistasis, freshwater snail, genetic load, inbreeding depression, *Lymnaea peregra*, mating system, self-fertilization, 1635

GENE FLOW
Adh, COI, *Drosophila willistoni*, *period*, phylogenetics, species concepts, 1093
Allozymes, biogeography, fish, gene flow, *Heterandria formosa*, isolation by distance, migration, nonequilibrium, stepping-stone model, 183
Allozymes, chloroplast DNA, gene flow, isolation by distance, phylogeography, population structure, refugia, *Senecio*, 355
Ambystoma barbouri, gene flow, ineffective antipredator behavior, local adaptation, 558
Analysis of variance, estimation, *F*-statistics, genic correlations, hierarchical population structure, 950
Bombina, cline, habitat preference, hybrid zone, linkage disequilibrium, 227
Calling song, genetic variation, genotype × environment interactions, hybrid zone, reproductive isolation, 1104
Cave Isopoda, F_{ST}, gene flow, private alleles, 432
Cepphus, glacial refugia, mitochondrial control region, phylogeography, Pleistocene, population genetics, speciation, 1158
Coalescent, gene flow, gene genealogy, neutrality, polymorphism, population structure, straying, 539
Coevolution, mtDNA, nuclear intron, phylogeography, Prodoxidae, 1376
Condition-dependent plumage traits, environmental effects, genetic plumage polymorphisms, secondary sexual characters, *Tyto alba*, 1451
cpDNA, gene flow, gynodioecy, population structure, *Silene*, 255
cpDNA, gene flow, microgeographic differentiation, mtDNA, *Pinus ponderosa*, spatial autocorrelation, 61
Cytochrome oxidase I, marine biogeography, *Tegula*, 12S rRNA, 1311
Cytonuclear, disequilibria, fire ants, haplodiploid, hybrid zone, *Solenopsis invicta*, *Solenopsis richteri*, X-linked, 1423
Deer, DNA, gene flow, hybridization, *Odocoileus*, paternal inheritance, Zfy, zinc finger, 1224
Extinction, gene flow, genetic differentiation, isolation by distance, marine angiosperm, recolonization, theta, *Zostera marina*, 330
Frequency cline, genetic succession, microevolution, natural populations, overproduced esterase, pleiotropy, 443
Gene flow, genetic barrier, hybrid zones, mathematical models, 1277
Gene flow, genetic neighborhood, inbreeding depression, outbreeding depression, population structure, 614
Hummingbird, hybrid fitness, hybrid zone, interspecific gene flow, *Ipomopsis*, pollen export, pollen receipt, pollinator effectiveness, 1602
Hybrid zone, marine biogeography, *Menippe*, mitochondrial DNA, phylogeography, Suwanee Straits, 1671

GENETIC DRIFT
Average effect, conversion, epistasis, Fisher, interdemic selection, metapopulation, shifting balance, variance components, Wright, 1537
Bottleneck, *Drosophila*, founder-flush, premating isolation, speciation, 1850
Breeding systems, *Crocidura russula*, dispersal, genetic structure, microsatellites, shrews, 1230
Cave Isopoda, F_{ST}, gene flow, private alleles, 432
Cyprinodon tularosa, *Pgdh*, phosphogluconate dehydrogenase, salinity, selection, translocation, White Sands pupfish, 1856
Cytonuclear, disequilibria, fire ants, haplodiploid, hybrid zone, *Solenopsis invicta*, *Solenopsis richteri*, X-linked, 1423

Effective population size, genetic drift, mtDNA, temporal variation, 910
Founder event, genetic architecture, genetic drift, genetic variation, heterozygosity, isolation-by-distance, mosquito systematics, *Wyeomyia smithii,* 1697

HERBIVORY
Chemical defense, Chrysomelidae, host plants, larval defensive secretion, *Phratora vitellinae,* plant-herbivore interactions, Salicaceae, 517

HERITABILITY
Additive genetic variance, dominance, genetic correlation, heritability, phenotypic correlations, sexual selection, 894
Aggression, courtship, *Drosophila silvestris,* heritability, sexual selection, 1487
Body size, CHD gene, extrapair paternity, *Ficedula albicollis,* genetic correlation, heritability, microsatellites, natural selection, sexual dimorphism, 870
Collinsia verna, direct-maternal genetic correlation, emergence time, maternal effects, maternal inheritance, quantitative genetics, seed size, 998
Dimorphism, genetic correlation, heritability, trade-offs, 1111
Drosophila, environmental stress, evolvability, heritability, variation, 1207
Drosophila, evolvability, fecundity, heritability, nature, temperature, 134
Drosophila, evolvability, field, fluctuating asymmetry, heritability, 816
Genetics, genotype-by-environment interaction, sex-ratio evolution, temperature-dependent sex determination, 1514
Heritability, maternal effect, *Orchesella cincta,* reaction norm, 1839
Heritability, maternal effects, morphometrics, 626

HYBRIDIZATION
Allonemobius, barrier to fertilization, conspecific sperm precedence, cricket, hybridization, reproductive isolation, speciation, 511
Avian behavior, behavioral evolution, congruence, DNA-DNA hybridization, phylogeny, 884
Calling song, genetic variation, genotype × environment interactions, hybrid zone, reproductive isolation, 1104
Centromeres, clines, FISH, house mice, hybrid zone, incompatibility, noncoincidence, NOR, Rb fusions, 592
Clinal variation, hybrid zone, introgression, katydid, *Orchelimum,* Potomac, southeastern United States, species replacement, Tettigoniidae, 784
Cytonuclear, disequilibria, fire ants, haplodiploid, hybrid zone, *Solenopsis invicta, Solenopsis richteri,* X-linked, 1423
Cytonuclear interactions, epistasis, Louisiana irises, natural hybridization, natural selection, RAPDs, reproductive isolation, 1304
Deer, DNA, gene flow, hybridization, *Odocoileus,* paternal inheritance, Zfy, zinc finger, 1224
Flower color, hybrid zone, *Ipomopsis,* male fitness, pollinator visitation, selection, trait manipulation, 1293
Generalized linear model, hybrid zones, interspecific hybridization, likelihood, mate choice, reproductive isolation, speciation, 503
Helianthus, hybridization, introgression, isozymes, outcrossing rates, speciation, sunflower, 713
Hummingbird, hybrid fitness, hybrid zone, interspecific gene flow, *Ipomopsis,* pollen export, pollen receipt, pollinator effectiveness, 1602
Hybrid fitness, Louisiana irises, mosaic hybrid zones, natural hybridization, natural selection, tension zones, 37

INBREEDING
Biparental inbreeding, gynodioecy, inbreeding depression, *Lobelia siphilitica,* 1572
Deleterious mutations, inbreeding depression, *Plantago coronopus,* self-fertilization, serial inbreeding, synergistic epistasis, 692
Epistasis, freshwater snail, genetic load, inbreeding depression, *Lymnaea peregra,* mating system, self-fertilization, 1635
Female choice, genetic incompatibility, good genes, *Gryllus bimaculatus,* inbreeding, polyandry, sperm competition, 1726
Fitness, gynodioecy, inbreeding depression, male fitness components, maternal effects of inbreeding, outbreeding depression, 44
Gene flow, genetic neighborhood, inbreeding depression, outbreeding depression, population structure, 614
Genetic load, inbreeding depression, *Peromyscus polionotus,* population bottlenecks, 900
Inbreeding, inbreeding depression, lethal equivalents, lifetime reproductive success, pedigree, song sparrow, survival, 240

INSECTS. SEE ALSO *DROSOPHILA*
Acetylcholinesterase, clines, *Culex pipiens,* fitness cost, gene duplication, insecticide resistance, resistance gene, 1705
Adaptation, extended phenotypes, gall morphology, gall thrips, phylogeny, 1686
Age-specific mutations, antagonistic pleiotropy, demography, mortality plateau, mutation accumulation, senescence, 454
Aging, developmental time, laboratory evolution, life history, selection, 1713
Allometry, genitalia, sexual selection, 415
Allonemobius, barrier to fertilization, conspecific sperm precedence, cricket, hybridization, reproductive isolation, speciation, 511
Allozymes, evolutionary trends, gall types, genetic constraints, Hymenoptera, Nematinae, phylogeny, sawflies, 465
Anarchy, *Apis mellifera,* kin selection, laying workers, social insects, worker policing, 1408
Apis mellifera, intergradation, microsatellite, mtDNA, population genetics, SSR, 1119
B chromosomes, *Eyprepocnemis plorans,* parasitic, selfish, 274
Biogeography, Cerataphidini, eusociality, mitochondrial DNA, molecular phylogenetics, social behavior, soldier aphids, 155
Body size, development, diapause, genetic variation, growth rate, life history, phenotypic plasticity, *Scathophaga stercoraria,* 1394
Bruchidae, *Callosobruchus maculatus,* egg size, maternal effect, phenotypic plasticity, 172
Calling song, genetic variation, genotype x environment interactions, hybrid zone, reproductive isolation, 1104
Carabus iwawakianus, Carabus maiyasanus, cost of copulation, genitalia, hybrid zone, lock-and-key hypothesis, selection against hybridization, 1507
Cave Isopoda, F_{ST}, gene flow, private alleles, 432
Chewing lice, cline models, dispersal distance, host-parasite coevolution, hybrid zones, pocket gophers, 278
Clinal variation, hybrid zone, introgression, katydid, *Orchelimum,* Potomac, southeastern United States, species replacement, Tettigoniidae, 784
Clone, environmental heterogeneity, genetic variation, intense selection, obligate parthenogen, *Penthaleus major,* 1325
Coevolution, Coleoptera, cytochrome oxidase I, *Dendroctonus,* insect-plant interactions, mitochondrial DNA, molecular systematics, phylogeny, phytophagous insects, 1731
Coevolution, host shifts, insect-host plant interactions, Lepidoptera, Papilionoidea, specialization, 486
Coevolution, mtDNA, nuclear intron, phylogeography, Prodoxidae, 1376
Cytonuclear, disequilibria, fire ants, haplodiploid, hybrid zone, *Solenopsis invicta, Solenopsis richteri,* X-linked, 1423
Decision rule, directional selection, mate choice, multivariate analysis, nonlinear selection, selection gradient, 1383
Developmental stability, fluctuating asymmetry, geometric morphometrics, *Glossina palpalis,* Procrustes analysis, shape, tsetse flies, wing veins, 1363
Diffuse coevolution, *Heliothis phloxiphagus, Hylemya, Ipomopsis aggregata,* multispecies coevolution, pairwise coevolution, plant-herbivore interaction, scarlet gilia, 1583
Dimorphism, genetic correlation, heritability, trade-offs, 1111
Evolution, fire ants, introduced species, monogyny, mtDNA, polygyny, relatedness, social insects, *Solenopsis invicta,* 1416

Female choice, genetic incompatibility, good genes, *Gryllus bimaculatus*, inbreeding, polyandry, sperm competition, 1726
Field cricket, multivariate logistic regression, *Ormia ochracea*, phonotactic parasitoid, *Teleogryllus oceanicus*, 166
Fig wasps, intensity of selection, sex ratio, stabilizing selection, variance, 475
Forficula auricularia, molecular phylogeny, mtDNA, population genetics, reproductive isolation, reproductive strategy, 260
Founder event, genetic architecture, genetic drift, genetic variation, heterozygosity, isolation-by-distance, mosquito systematics, *Wyeomyia smithii*, 1697
Generalized linear model, hybrid zones, interspecific hybridization, likelihood, mate choice, reproductive isolation, speciation, 503
Heritability, maternal effect, *Orchesella cincta*, reaction norm, 1839
Heritability, maternal effects, morphometrics, 626
Microsatellites, *Polistes*, relatedness, social control, worker policing, 797

LIFE HISTORY
Aging, developmental time, laboratory evolution, life history, selection, 1713
Allozymes, comparative approach, *Etheostoma*, life history, mitochondrial DNA, *Percina*, population history, 1781
Body size, development, diapause, genetic variation, growth rate, life history, phenotypic plasticity, *Scathophaga stercoraria*, 1394
Climate, life history, morphology, mortality, Nebraska, Petrochelidon, pyrrhonota, survival, 1461
Colonization, extinction, life history, outcrossing, perenniality, seed bank, self-fertilization, 657
Comparative methods, independent contrasts, life history, *Phrynosoma*, phylogeny, sexual size dimorphism, 1821
Cost of reproduction, egg limitation, life-history trade-offs, parasitoids, rate maximization, time limitation, 1241
Costs of reproduction, fecundity, lifetime reproductive success, lizards, offspring size, reproduction, reproductive effort, snakes, survival, 1236
Daphnia pulex, deleterious mutation, life-history variation, mutation accumulation, mutation-selection balance, 727
Desiccation, developmental time, *Drosophila melanogaster*, growth rate, life-history evolution, physiology, starvation, stress resistance, trade-offs, 1342

MAMMALS
Adaptive radiation, cladogenesis, rodent, speciation, subterranean, tree balance, 1521
Additive genetic variance, dominance, genetic correlation, heritability, phenotypic correlations, sexual selection, 894
Breeding systems, *Crocidura russula*, dispersal, genetic structure, microsatellites, shrews, 1230
Centromeres, clines, FISH, house mice, hybrid zone, incompatibility, noncoincidence, NOR, Rb fusions, 592
Chewing lice, cline models, dispersal distance, host-parasite coevolution, hybrid zones, pocket gophers, 278
Deer, DNA, gene flow, hybridization, *Odocoileus*, paternal inheritance, Zfy, zinc finger, 1224
Genetic load, inbreeding depression, *Peromyscus polionotus*, population bottlenecks, 900
Malaria, mixed infection, parasite, *Plasmodium chabaudi*, virulence, 583
Meiotic drive, *t* haplotypes, transmission ratio distortion, wild mice, 1185

MITOCHONDRIAL DNA
Abies, conifer, mtDNA, phylogeny, polymorphism, *rbc*L, 1031
Adh, COI, *Drosophila willistoni*, *period*, phylogenetics, species concepts, 1093
Albinaria, Crete, land snails, mitochondrial ribosomal RNA, molecular systematics, paleogeography, phylogeography, 116
Allozymes, biogeography, Crustacea, *Daphnia*, dispersal, mtDNA, 1648
Allozymes, biogeography, mtDNA, phylogeography, Point Conception, *Tigriopus*, 734
Allozymes, comparative approach, *Etheostoma*, life history, mitochondrial DNA, *Percina*, population history, 1781
Apis mellifera, intergradation, microsatellite, mtDNA, population genetics, SSR, 1119
Associative overdominance, *Gadus morhua*, growth rate, heterozygosity, nuclear RFLP loci, 915
Best-fit models, long-branch attraction, maximum likelihood, minimum evolution, phylogeny reconstruction, 978
Biogeography, Cerataphidini, eusociality, mitochondrial DNA, molecular phylogenetics, social behavior, soldier aphids, 155
Brood parasitism, coevolution, cospeciation, mitochondrial DNA restriction sites, phylogeny, *Vidua*, 566
Clonal structure, coral reef, disturbance, DNA fingerprinting, genotypic diversity, octocoral, vegetative propagation, 379
Coevolution, Coleoptera, cytochrome oxidase I, *Dendroctonus*, insect-plant interactions, mitochondrial DNA, molecular systematics, phylogeny, phytophagous insects, 1731
Coevolution, mtDNA, nuclear intron, phylogeography, Prodoxidae, 1376
cpDNA, gene flow, microgeographic differentiation, mtDNA, *Pinus ponderosa*, spatial autocorrelation, 61
Cytochrome *b*, mitochondrial DNA, phylogeny, speciation, species flock, 1135
Deer, DNA, gene flow, hybridization, *Odocoileus*, paternal inheritance, Zfy, zinc finger, 1224
Effective population size, genetic drift, mtDNA, temporal variation, 910
Evolution, fire ants, introduced species, monogyny, mtDNA, polygyny, relatedness, social insects, *Solenopsis invicta*, 1416
Hybrid zone, marine biogeography, *Menippe*, mitochondrial DNA, phylogeography, Suwanee Straits, 1671
Introgression, lineage extinction, mtDNA paraphyly, *Mytilus*, phylogeny, 100
Meiotic drive, *t* haplotypes, transmission ratio distortion, wild mice, 1185

MOLECULAR EVOLUTION
Aesculus, biogeography, Hippocastanaceae, internal transcribed spacers, *matK*, origin, phylogeny, 988

MOLLUSKS
Adaptation, Corbulidae, functional morphology, Naticidae, predator-prey, shell, 68
Crassostrea, dioecy, evolution, hermaphroditism, mollusc, oyster, protandry, sex, sex change, sex determination, sexual maturation, 394
Introgression, lineage extinction, mtDNA paraphyly, *Mytilus*, phylogeny, 100

MORPHOLOGY
Adaptation, Corbulidae, functional morphology, Naticidae, predator-prey, shell, 68
Adaptation, dispersal, dormancy, ecotypic differentiation, genetic distance, germination, *Heterosperma pinnatum*, morphometrics, seed heteromorphism, 344
Adaptation, extended phenotypes, gall morphology, gall thrips, phylogeny, 1686
Anatomy, brain, developmental constraints, electric organs, histology, morphology, phylogenetic analysis, sensory receptors, specialization, vertebrate, 1760
Climate, life history, morphology, mortality, Nebraska, Petrochelidon, pyrrhonota, survival, 1461
Developmental stability, fluctuating asymmetry, geometric morphometrics, *Glossina palpalis*, Procrustes analysis, shape, tsetse flies, wing veins, 1363
Heritability, maternal effects, morphometrics, 626
Limb evolution, parsimony, polydactyly, tetrapods, 1476

PARASITISM
Antibiotic resistance, conjugation, *Escherichia coli*, experimental evolution, host density, parasite, plasmid, tradeoff, transmission mode, virulence, 315
B chromosomes, *Eyprepocnemis plorans*, parasitic, selfish, 274
Biogeography, evolution, genetics, parasite, pathogen, trade-off, virulence, 1865

Biomphalaria glabrata, heritability, host-parasite coevolution, resistance, *Schistosoma mansoni,* strain specificity, susceptibility, 1627
Bruchidae, *Callosobruchus maculatus,* egg size, maternal effect, phenotypic plasticity, 172
Chewing lice, cline models, dispersal distance, host-parasite coevolution, hybrid zones, pocket gophers, 278
Clonal diversity, frequency-dependent selection, parasitism, Red Queen hypothesis, 1057
Cost of reproduction, egg limitation, life-history trade-offs, parasitoids, rate maximization, time limitation, 1241
Cuckoldry, kleptogamy, mating system, polygamy, 848
Daphnia magna, dose effects, genetic correlation, *Glugoides intestinalis,* parasite, trade-off, within-host growth, 1869
Drosophila, general-purpose genotypes, genetic variation, host races, host specificity, *Howardula,* parasites, 832
Field cricket, multivariate logistic regression, *Ormia ochracea,* phonotactic parasitoid, *Teleogryllus oceanicus,* 166
Heritability, maternal effect, *Orchesella cincta,* reaction norm, 1839
Host-parasite coevolution, Muller's ratchet, mutational deterministic hypothesis, Red Queen hypothesis, sexual reproduction, synergistic epistasis, 604
Malaria, mixed infection, parasite, *Plasmodium chabaudi,* virulence, 583

Phenotypic Plasticity
Additive genetic variance, dominance, genetic correlation, heritability, phenotypic correlations, sexual selection, 894
Allelic sensitivity, phenotypic plasticity, *Populus,* QTL mapping, regulatory loci, 967
Artificial selection, flight, latitudinal cline, phenotypic plasticity, thermal selection, wing loading, 1353
Body size, development, diapause, genetic variation, growth rate, life history, phenotypic plasticity, *Scathophaga stercoraria,* 1394
Bruchidae, *Callosobruchus maculatus,* egg size, maternal effect, phenotypic plasticity, 172
Bryozoan, inducible defense, *Membranipora,* norm of reaction, phenotypic plasticity, 80
Chaoborus, cost, *Daphnia pulex,* metabolism, phenotypic plasticity, 368
Characteristic value, *Drosophila simulans,* genetic variation, phenotypic plasticity, reaction norm, 1501
Condition-dependent plumage traits, environmental effects, genetic plumage polymorphisms, secondary sexual characters, *Tyto alba,* 1451

Phylogeny
Abies, conifer, mtDNA, phylogeny, polymorphism, *rbc*L, 1031
Adaptation, comparative, lizards, locomotion, phylogeny, 219
Adaptation, extended phenotypes, gall morphology, gall thrips, phylogeny, 1686
Adaptive radiation, Araneae, key innovation, null Markovian model, orb web evolution, 403
Adh, COI, *Drosophila willistoni, period,* phylogenetics, species concepts, 1093
Aesculus, biogeography, Hippocastanaceae, internal transcribed spacers, *matK,* origin, phylogeny, 988
Albinaria, Crete, land snails, mitochondrial ribosomal RNA, molecular systematics, paleogeography, phylogeography, 116
Allometry, comparative method, independent contrasts, phylogeny, random trees, Rensch's rule, sexual size dimorphism, 1197
Allozyme, *Avicennia,* biogeography, diversity, genetics, mangrove, phylogeny, 1612
Allozymes, biogeography, mtDNA, phylogeography, Point Conception, *Tigriopus,* 734
Allozymes, chloroplast DNA, gene flow, isolation by distance, phylogeography, population structure, refugia, *Senecio,* 355
Allozymes, evolutionary trends, gall types, genetic constraints, Hymenoptera, Nematinae, phylogeny, sawflies, 465
Anatomy, brain, developmental constraints, electric organs, histology, morphology, phylogenetic analysis, sensory receptors, specialization, vertebrate, 1760
Avian behavior, behavioral evolution, congruence, DNA-DNA hybridization, phylogeny, 884
Best-fit models, long-branch attraction, maximum likelihood, minimum evolution, phylogeny reconstruction, 978
Biogeography, Cerataphidini, eusociality, mitochondrial DNA, molecular phylogenetics, social behavior, soldier aphids, 155
Body size, comparative methods, multiple regression, phylogenetic autocorrelation, phylogenetic inertia, principal coordinate analysis, 1247
Brood parasitism, coevolution, cospeciation, mitochondrial DNA restriction sites, phylogeny, *Vidua,* 566
Cepphus, glacial refugia, mitochondrial control region, phylogeography, Pleistocene, population genetics, speciation, 1158
Character evolution, oviparity, phylogeny, reproductive mode, reptiles, squamates, viviparity, 1441
Coancestry coefficient, evolution, genealogy, molecular phylogeny, pedigree, 957
Coevolution, Coleoptera, cytochrome oxidase I, *Dendroctonus,* insect-plant interactions, mitochondrial DNA, molecular systematics, phylogeny, phytophagous insects, 1731
Comparative methods, independent contrasts, life history, *Phrynosoma,* phylogeny, sexual size dimorphism, 1821
Cytochrome *b,* mitochondrial DNA, phylogeny, speciation, species flock, 1135
Forficula auricularia, molecular phylogeny, mtDNA, population genetics, reproductive isolation, reproductive strategy, 260
F_{ST}, maximum likelihood, phylogeny, population divergence, population history, population size, population subdivision, 669
Hybrid zone, marine biogeography, *Menippe,* mitochondrial DNA, phylogeography, Suwanee Straits, 1671
Introgression, lineage extinction, mtDNA paraphyly, *Mytilus,* phylogeny, 100
Limb evolution, parsimony, polydactyly, tetrapods, 1476
Plumage color, sexual dichromatism, sexual dimorphism, sexual selection, tanager, Thraupidae, 1219

Plant-Insect Interaction
Artificial selection, *Brassica rapa,* costs, defense, glucosinolates, plant-insect interactions, resistance, tolerance, 703
Chemical defense, Chrysomelidae, host plants, larval defensive secretion, *Phratora vitellinae,* plant-herbivore interactions, Salicaceae, 517
Chrysomelidae, host fidelity, host preference, insect-plant interactions, *Neochlamisus bebbianae,* pleiotropy, reproductive isolation, sibling species, 1744
Coevolution, Coleoptera, cytochrome oxidase I, *Dendroctonus,* insect-plant interactions, mitochondrial DNA, molecular systematics, phylogeny, phytophagous insects, 1731
Coevolution, host shifts, insect-host plant interactions, Lepidoptera, Papilionoidea, specialization, 486
Daphnia pulex, deleterious mutation, life-history variation, mutation accumulation, mutation-selection balance, 727
Diffuse coevolution, *Heliothis phloxiphagus, Hylemya, Ipomopsis aggregata,* multispecies coevolution, pairwise coevolution, plant-herbivore interaction, scarlet gilia, 1583

Plants
Abies, conifer, mtDNA, phylogeny, polymorphism, *rbc*L, 1031
Adaptation, dispersal, dormancy, ecotypic differentiation, genetic distance, germination, *Heterosperma pinnatum,* morphometrics, seed heteromorphism, 344
Aesculus, biogeography, Hippocastanaceae, internal transcribed spacers, *matK,* origin, phylogeny, 988
Allozyme, *Avicennia,* biogeography, diversity, genetics, mangrove, phylogeny, 1612
Allozymes, chloroplast DNA, gene flow, isolation by distance, phylogeography, population structure, refugia, *Senecio,* 355
Artificial selection, *Brassica rapa,* costs, defense, glucosinolates, plant-insect interactions, resistance, tolerance, 703
Biparental inbreeding, gynodioecy, inbreeding depression, *Lobelia siphilitica,* 1572
Chaoborus, cost, *Daphnia pulex,* metabolism, phenotypic plasticity, 368

Collinsia verna, direct-maternal genetic correlation, emergence time, maternal effects, maternal inheritance, quantitative genetics, seed size, 998
cpDNA, gene flow, gynodioecy, population structure, *Silene*, 255
cpDNA, gene flow, microgeographic differentiation, mtDNA, *Pinus ponderosa*, spatial autocorrelation, 61
Cytonuclear interactions, epistasis, Louisiana irises, natural hybridization, natural selection, RAPDs, reproductive isolation, 1304
Deleterious mutations, inbreeding depression, *Plantago coronopus*, self-fertilization, serial inbreeding, synergistic epistasis, 692
Developmental innovation, female gametophyte, fertilization, *Gnetum*, heterochrony, seed plants, 1016
Developmental instability, environmental stress, fluctuating asymmetry, genetic stress, *Lychnis viscaria*, marginal populations, population size, 1285
Diffuse coevolution, *Heliothis phloxiphagus*, *Hylemya*, *Ipomopsis aggregata*, multispecies coevolution, pairwise coevolution, plant-herbivore interaction, scarlet gilia, 1583
Evolutionarily stable strategy, female-biased sexual allocation, hermaphroditic plants, reproductive phenology, 1204
Extinction, gene flow, genetic differentiation, isolation by distance, marine angiosperm, recolonization, theta, *Zostera marina*, 330
Fecundity selection, mate availability, plant mating systems, self-incompatibility, 19
Fitness, genotype-environment interaction, natural selection, spatial variation, temporal variation, 678
Flower color, hybrid zone, *Ipomopsis*, male fitness, pollinator visitation, selection, trait manipulation, 1293
Frequency-dependent selection, gynodioecy, population structure, sex ratio, 30
Gene flow, genetic barrier, hybrid zones, mathematical models, 1277
Gene flow, genetic neighborhood, inbreeding depression, outbreeding depression, population structure, 614
Germination, mating system, outcrossing, polymorphism, selfing, *Senecio*, 1593
Helianthus, hybridization, introgression, isozymes, outcrossing rates, speciation, sunflower, 713
Hybrid fitness, Louisiana irises, mosaic hybrid zones, natural hybridization, natural selection, tension zones, 37

PLATYHELMINTHES

Cost of sex, *Dugesia*, hermaphroditism, parthenogenesis, Platyhelminthes, polyploidy, sex allocation, 109

POLYMORPHISM

Abies, conifer, mtDNA, phylogeny, polymorphism, *rbc*L, 1031
Anarchy, *Apis mellifera*, kin selection, laying workers, social insects, worker policing, 1408
B chromosomes, *Eyprepocnemis plorans*, parasitic, selfish, 274
Bacterial evolution, group selection, homoserine lactones, quorum sensing, signaling, 1263
Bottleneck, conservation, evolutionarily significant unit, parasite resistance, polymorphism, 194
Coalescent, gene flow, gene genealogy, neutrality, polymorphism, population structure, straying, 539
Condition-dependent plumage traits, environmental effects, genetic plumage polymorphisms, secondary sexual characters, *Tyto alba*, 1451
Frequency-dependent selection, happy-face spider, population structure, 775
Germination, mating system, outcrossing, polymorphism, selfing, *Senecio*, 1593

POPULATION STRUCTURE

Allozyme electrophoresis, barriers to dispersal, frog, genetic divergence, population genetic structure, range change, southwestern Australia, speciation, 1147
Allozymes, chloroplast DNA, gene flow, isolation by distance, phylogeography, population structure, refugia, *Senecio*, 355
Analysis of variance, estimation, *F*-statistics, genic correlations, hierarchical population structure, 950
Average effect, conversion, epistasis, Fisher, interdemic selection, metapopulation, shifting balance, variance components, Wright, 1537
Breeding systems, *Crocidura russula*, dispersal, genetic structure, microsatellites, shrews, 1230
Coalescent, gene flow, gene genealogy, neutrality, polymorphism, population structure, straying, 539
Coancestry coefficient, evolution, genealogy, molecular phylogeny, pedigree, 957
cpDNA, gene flow, gynodioecy, population structure, *Silene*, 255
Diffusion approximation, Sewall Wright, shifting-balance theory, stochastic simulation models, substructured populations, 1834
Effective population size, genetic drift, mtDNA, temporal variation, 910
Frequency cline, genetic succession, microevolution, natural populations, overproduced esterase, pleiotropy, 443
Frequency-dependent selection, gynodioecy, population structure, sex ratio, 30
Frequency-dependent selection, happy-face spider, population structure, 775
F_{ST}, maximum likelihood, phylogeny, population divergence, population history, population size, population subdivision, 669
Gene flow, genetic barrier, hybrid zones, mathematical models, 1277
Gene flow, genetic neighborhood, inbreeding depression, outbreeding depression, population structure, 614
Logistic regression, microevolution, multiple linear regression, multivariate selection, natural selection, selection analysis, sexual selection, 1564
Meiotic drive, *t* haplotypes, transmission ratio distortion, wild mice, 1185

PREDATION

Adaptation, Corbulidae, functional morphology, Naticidae, predator-prey, shell, 68
Aposematism, benzaldehyde, chemical defense, *Cicindela*, cryptic coloration, habitat association, predator, 529

QUANTITATIVE GENETICS

Adaptation, Fisher's model, natural selection, phenotypic evolution, quantitative trait locus, 935
Allelic sensitivity, phenotypic plasticity, *Populus*, QTL mapping, regulatory loci, 967
Canalization, epistasis, evolution of development, phenotype landscape, quantitative genetics, 647
Collinsia verna, direct-maternal genetic correlation, emergence time, maternal effects, maternal inheritance, quantitative genetics, seed size, 998

REPRODUCTION—ANIMAL

Acrocephalus arundinaceus, lifetime reproductive success, natal dispersal, site fidelity, 877
Adaptation, Alpine lizard, *Niveoscincus*, offspring survival, parturition, 1861
Anura, comparative method, frogs, reproductive isolation, speciation, 1811
Barnacle goose, body size, *Branta leucopsis*, food quality, reproductive success, selection, survival, 1169
Bateman's principle, echinoid, egg size, fertilization success, sexual selection, sperm limitation, 1043
Carabus iwawakianus, *Carabus maiyasanus*, cost of copulation, genitalia, hybrid zone, lock-and-key hypothesis, selection against hybridization, 1507
Competition, environmental stress, geographic parthenogenesis, mutational deterministic hypothesis, *Potamopyrgus antipodarum*, sexual reproduction, 1482
Cost of reproduction, egg limitation, life-history trade-offs, parasitoids, rate maximization, time limitation, 1241
Costs of reproduction, fecundity, lifetime reproductive success, lizards, offspring size, reproduction, reproductive effort, snakes, survival, 1236
Cuckoldry, maternity, mating system, microsatellites, paternity, polygyny, sexual selection, 1802
Drosophila hibisci, ecological genetics, epistasis, genotype-by-

environment interactions, *Hibiscus*, latitudinal cline, line-cross analysis, maternal effects, ovariole number, 806
Drosophila pseudoobscura, hybrid sterility, sperm heteromorphism, sperm motility, 266
Evolutionarily stable strategy, female-biased sexual allocation, hermaphroditic plants, reproductive phenology, 1204
Host-parasite coevolution, Muller's ratchet, mutational deterministic hypothesis, Red Queen hypothesis, sexual reproduction, synergistic epistasis, 604
Inbreeding, inbreeding depression, lethal equivalents, lifetime reproductive success, pedigree, song sparrow, survival, 240
Microsatellites, *Polistes*, relatedness, social control, worker policing, 797

Reproduction—Plant
Colonization, extinction, life history, outcrossing, perenniality, seed bank, self-fertilization, 657
Fecundity selection, mate availability, plant mating systems, self-incompatibility, 19

Reptiles
Adaptation, Alpine lizard, *Niveoscincus*, offspring survival, parturition, 1861
Adaptation, comparative, lizards, locomotion, phylogeny, 219
Ambystoma barbouri, gene flow, ineffective antipredator behavior, local adaptation, 558
Character evolution, oviparity, phylogeny, reproductive mode, reptiles, squamates, viviparity, 1441
Comparative methods, independent contrasts, life history, *Phrynosoma*, phylogeny, sexual size dimorphism, 1821
Costs of reproduction, fecundity, lifetime reproductive success, lizards, offspring size, reproduction, reproductive effort, snakes, survival, 1236
Genetics, genotype-by-environment interaction, sex-ratio evolution, temperature-dependent sex determination, 1514

Resistance
Acetylcholinesterase, clines, *Culex pipiens*, fitness cost, gene duplication, insecticide resistance, resistance gene, 1705
Allelopathy, colicin resistance, colicins, *Escherichia coli*, pleiotropy, 1270
Artificial selection, *Brassica rapa*, costs, defense, glucosinolates, plant-insect interactions, resistance, tolerance, 703
Artificial selection, *Drosophila melanogaster*, intermediary metabolism enzymes, metabolic rate, starvation, starvation resistance, stress resistance, 1679
Biomphalaria glabrata, heritability, host-parasite coevolution, resistance, *Schistosoma mansoni*, strain specificity, susceptibility, 1627
Desiccation, developmental time, *Drosophila melanogaster*, growth rate, life-history evolution, physiology, starvation, stress resistance, trade-offs, 1342

Selection—Artificial
Artificial selection, *Brassica rapa*, costs, defense, glucosinolates, plant-insect interactions, resistance, tolerance, 703
Artificial selection, *Drosophila melanogaster*, intermediary metabolism enzymes, metabolic rate, starvation, starvation resistance, stress resistance, 1679
Artificial selection, flight, latitudinal cline, phenotypic plasticity, thermal selection, wing loading, 1353

Selection—Natural
Adaptation, Fisher's model, natural selection, phenotypic evolution, quantitative trait locus, 935
Adaptive radiation, body size, natural selection, reproductive isolation, speciation, stickleback, 209
Aging, developmental time, laboratory evolution, life history, selection, 1713
Barnacle goose, body size, *Branta leucopsis*, food quality, reproductive success, selection, survival, 1169
Body size, CHD gene, extrapair paternity, *Ficedula albicollis*, genetic correlation, heritability, microsatellites, natural selection, sexual dimorphism, 870
Body size, *Drosophila melanogaster*, environmental stress, heat resistance, larval density, selection, 619
Carabus iwawakianus, *Carabus maiyasanus*, cost of copulation, genitalia, hybrid zone, lock-and-key hypothesis, selection against hybridization, 1507
Chrysomelidae, host fidelity, host preference, insect-plant interactions, *Neochlamisus bebbianae*, pleiotropy, reproductive isolation, sibling species, 1744
Climate, life history, morphology, mortality, Nebraska, Petrochelidon, pyrrhonota, survival, 1461
Clone, environmental heterogeneity, genetic variation, intense selection, obligate parthenogen, *Penthaleus major*, 1325
Cost of sex, *Dugesia*, hermaphroditism, parthenogenesis, Platyhelminthes, polyploidy, sex allocation, 109
Cyprinodon tularosa, *Pgdh*, phosphogluconate dehydrogenase, salinity, selection, translocation, White Sands pupfish, 1856
Cytonuclear interactions, epistasis, Louisiana irises, natural hybridization, natural selection, RAPDs, reproductive isolation, 1304
Drosophila melanogaster, gamma-Gompertz model, life span, mortality parameters, senescence, 1844
Evolution, fire ants, introduced species, monogyny, mtDNA, polygyny, relatedness, social insects, *Solenopsis invicta*, 1416
Field cricket, multivariate logistic regression, *Ormia ochracea*, phonotactic parasitoid, *Teleogryllus oceanicus*, 166
Fitness, genotype-environment interaction, natural selection, spatial variation, temporal variation, 678
Flower color, hybrid zone, *Ipomopsis*, male fitness, pollinator visitation, selection, trait manipulation, 1293
Frequency-dependent selection, gynodioecy, population structure, sex ratio, 30
Germination, mating system, outcrossing, polymorphism, selfing, *Senecio*, 1593
Hybrid fitness, Louisiana irises, mosaic hybrid zones, natural hybridization, natural selection, tension zones, 37
Logistic regression, microevolution, multiple linear regression, multivariate selection, natural selection, selection analysis, sexual selection, 1564

Selection—Sexual
Additive genetic variance, dominance, genetic correlation, heritability, phenotypic correlations, sexual selection, 894
Aggression, courtship, *Drosophila silvestris*, heritability, sexual selection, 1487
Allometry, genitalia, sexual selection, 415
Bateman's principle, echinoid, egg size, fertilization success, sexual selection, sperm limitation, 1043
Compatibility, cryptic female choice, sexual selection, sperm choice, sperm competition, 1212
Cooperative communication, game theory, handicap principle, honest signaling, signal detection theory, 1554
Courtship song, *Drosophila*, genetic distance, postmating isolation, sexual isolation, speciation, 1493
Cuckoldry, kleptogamy, mating system, polygamy, 848
Cuckoldry, maternity, mating system, microsatellites, paternity, polygyny, sexual selection, 1802
Decision rule, directional selection, mate choice, multivariate analysis, nonlinear selection, selection gradient, 1383
Dominance, *Drosophila*, homeostasis, sex, sexual selection, speciation, 1080
Drosophila, mating choice tests, mating propensity, sexual isolation, 126
Drosophila, microsatellites, multiple mating, sperm competition, 1334
Evolutionarily stable strategy, female-biased sexual allocation, hermaphroditic plants, reproductive phenology, 1204
Feather ornaments, Fisherian mechanism, indicator models, runaway process, sexual selection, viability models, 859
Female preference, interlocus contest evolution (ICE), intersexual conflict, mate choice, sensory exploitation, sexual selection, 1
Field cricket, multivariate logistic regression, *Ormia ochracea*, phonotactic parasitoid, *Teleogryllus oceanicus*, 166
Fig wasps, intensity of selection, sex ratio, stabilizing selection, variance, 475

Frequency-dependent selection, happy-face spider, population structure, 775
Interaction-dependent sexual selection, interaction-independent sexual selection, intersexual competition, mate choice, sexual selection, 8
Logistic regression, microevolution, multiple linear regression, multivariate selection, natural selection, selection analysis, sexual selection, 1564
Plumage color, sexual dichromatism, sexual dimorphism, sexual selection, tanager, Thraupidae, 1219

SENESCENCE
Age-specific mutations, antagonistic pleiotropy, demography, mortality plateau, mutation accumulation, senescence, 454
Aging, developmental time, laboratory evolution, life history, selection, 1713
Drosophila melanogaster, gamma-Gompertz model, life span, mortality parameters, senescence, 1844

SEX
Crassostrea, dioecy, evolution, hermaphroditism, mollusk, oyster, protandry, sex, sex change, sex determination, sexual maturation, 394
Host-parasite coevolution, Muller's ratchet, mutational deterministic hypothesis, Red Queen hypothesis, sexual reproduction, synergistic epistasis, 604

SPECIATION
Adaptive radiation, body size, natural selection, reproductive isolation, speciation, stickleback, 209
Adaptive radiation, cladogenesis, rodent, speciation, subterranean, tree balance, 1521
Albinaria, Crete, land snails, mitochondrial ribosomal RNA, molecular systematics, paleogeography, phylogeography, 116
Allonemobius, barrier to fertilization, conspecific sperm precedence, cricket, hybridization, reproductive isolation, speciation, 511
Allozyme electrophoresis, barriers to dispersal, frog, genetic divergence, population genetic structure, range change, southwestern Australia, speciation, 1147
Allozymes, COI, dispersal, geographic isolation, phylogeography, Pleistocene, Point Conception, range expansion, 12S, vicariance, zoogeographic boundary, 757
Anura, comparative method, frogs, reproductive isolation, speciation, 1811
Bottleneck, *Drosophila*, founder-flush, premating isolation, speciation, 1850
Cepphus, glacial refugia, mitochondrial control region, phylogeography, Pleistocene, population genetics, speciation, 1158
Chrysomelidae, host fidelity, host preference, insect-plant interactions, *Neochlamisus bebbianae*, pleiotropy, reproductive isolation, sibling species, 1744
Courtship song, *Drosophila*, genetic distance, postmating isolation, sexual isolation, speciation, 1493
Cytochrome oxidase I, marine biogeography, *Tegula*, 12S rRNA, 1311
Dominance, *Drosophila*, homeostasis, sex, sexual selection, speciation, 1080
Drosophila, Haldane's rule, hybrid sterility, reproductive isolation, speciation, spermatogenesis, 1067
Feather ornaments, Fisherian mechanism, indicator models, runaway process, sexual selection, viability models, 859
Generalized linear model, hybrid zones, interspecific hybridization, likelihood, mate choice, reproductive isolation, speciation, 503
Helianthus, hybridization, introgression, isozymes, outcrossing rates, speciation, sunflower, 713
Prezygotic isolation, reinforcement, reproductive character displacement, speciation, sticklebacks, 200

SYSTEMATICS
Albinaria, Crete, land snails, mitochondrial ribosomal RNA, molecular systematics, paleogeography, phylogeography, 116
Founder event, genetic architecture, genetic drift, genetic variation, heterozygosity, isolation-by-distance, mosquito systematics, *Wyeomyia smithii*, 1697

VARIATION
Adaptive radiation, cladogenesis, rodent, speciation, subterranean, tree balance, 1521
Bryozoan, inducible defense, *Membranipora*, norm of reaction, phenotypic plasticity, 80
Calling song, genetic variation, genotype x environment interactions, hybrid zone, reproductive isolation, 1104
Climatic adaptation, *Drosophila ananassae*, *D. melanogaster*, India, *Zaprionus indianus*, 825
Clinal variation, hybrid zone, introgression, katydid, *Orchelimum*, Potomac, southeastern United States, species replacement, Tettigoniidae, 784
Clone, environmental heterogeneity, genetic variation, intense selection, obligate parthenogen, *Penthaleus major*, 1325
Daphnia pulex, deleterious mutation, life-history variation, mutation accumulation, mutation-selection balance, 727
Drosophila, environmental stress, evolvability, heritability, variation, 1207
Drosophila, general-purpose genotypes, genetic variation, host races, host specificity, *Howardula*, parasites, 832
Effective population size, genetic drift, mtDNA, temporal variation, 910
Fitness, genotype-environment interaction, natural selection, spatial variation, temporal variation, 678

VIRUSES
Evolution of fitness, experimental evolution, Muller's ratchet, RNA viruses, VSV, 309
